

## Roads update 1/23/19

Dear Homeowner,

In preparation for the curb overlay work by Eagle Paving, which is tentatively scheduled for the 3rd week in February, please have the bushes and shrubs on your property cleared at least one (1) inch back from the curb and 48 inches up from the top of the curb by 2/1/19. Additionally, please move rocks at least one inch away from the back of the curb. After 2/1/19, all plant matter that will impede the curb overlay work being completed by Eagle Paving as scheduled, will be removed by Green Horizons. Please note, Green Horizons will not be moving any rocks. If you choose not to move your rocks there will likely be a noticeable difference in asphalt where the asphalt overlay could not be completed due to rock infringement.

If you have questions regarding the plant clearing expectations, please contact Curtis Management at 760-643-2200 as soon as possible. As always, your cooperation is appreciated to ensure the project is not further delayed.

(Please note the 48" height requirement is due to the size of the machine used for the overlay process.)

Additionally, the speed humps are also scheduled for installation during the 3rd week in February. There should be no traffic delays during the curb overlay work and speed hump installation, but please follow directions provided by the Eagle Paving crews that week.

Thank you for your continued patience.
